SUMMARY

Computer Science graduate with a passion for building thoughtful web/mobile applications. My technical prowess with an eye for user-experience, I bring a strong mindset for creating efficiency while keeping users satisfied. Eager to learn, expand, and sharpen my skills to continue growing as a developer and solve real-world problems.

EDUCATION

Honours BSc Computer Science

Lassonde School of Engineering, York University

09/2019 – 04/2025

Toronto, CA

PROJECTS

Electric Vehicle Store

- Designed and built a fully functional, **REST**ful e-commerce website from end to end using modern technology such as **React** (frontend), **Node.js** and **Express** (backend), and **AWS** (cloud)
- Ensured security against XSS/SQLi through usage of **Sequelize** (ORM for database integration), parameterized queries, and strong input validation
- Followed the full software development lifecycle (SDLC), including planning, design, development, testing, deployment, and maintenance

Grocery List App User Study

- Conducted a Comparative User Study obtaining User/CPU performance and Usability Feedback between Voice-to-text vs GUI
- Developed a Grocery List application using **Java** and **Android Studio**, with a strong focus on accessibility for users with impairments with **voice-to-text** and **text-to-speech** functionality
- Concluded findings of voice-to-text as **26%** faster than soft keyboard through participant study
- Administrated tests to examine performance and resource utilization, concluding that keyboard search method consumed **30%** more CPU performance than voice-to-text
- Led real participant interviews and questionnaires following the Interaction Design Process approach

PROFESSIONAL EXPERIENCE

MX Product Quality and Optimization Coordinator

04/2022 – 08/2022

Samsung Electronics Canada

- Executed structured manual QA test cases for RCS protocol across ~20 Samsung devices and ~15 ISP SIM cards, documenting results and tracking carrier-specific issues using Excel
- Collaborated with team to conduct thorough testing and analysis of product features and functionalities
- Participated in cross-functional meetings to discuss findings and propose solutions for enhancing product performance

COURSES

Building E-commerce Systems

Grade: A

- Designed and analyzed multi-tier e-commerce architectures using MVC, layered design patterns, RESTful services, microservices, SaaS architectures, scalability strategies, and secure system design patterns

Mobile User Interface

Grade: A

- Conducted user studies to evaluate usability alongside implementation of a mobile application in Android (Java) following core UI/UX design principles
