Hwan (Thomas) Kim

Software Developer | *Oakville, ON*

thomas.san03@gmail.com | Portfolio | LinkedIn | GitHub

SUMMARY

Full-Stack Software Developer with a strong technical foundation in **JavaScript, TypeScript, React**, **Node.js**, and **SQL**, complemented by a systems-oriented mindset. Passionate about building scalable, efficient, and user-focused applications, with an aptitude for learning I am eager to continuously grow, and tackle complex challenges by combining full-stack development expertise with the logical precision of system design.

EDUCATION

Honours BSc Computer Science 09/2019 – 04/2025
Lassonde School of Engineering, York University Toronto, CA

PROJECTS

Electric Vehicle Store
- Designed and built a fully functional, **REST**ful e-commerce website from end to end using modern technology such as **React** (frontend), **Node.js** and **Express** (backend), and **AWS** (cloud)
- Ensured security against XSS/SQLi through usage of **Sequelize** (ORM for database integration), parameterized queries, and strong input validation
- Followed the full software development lifecycle (SDLC), including planning, design, development, testing, deployment, and maintenance

YU*YL (Digital Wardrobe App)
- Developed a mobile digital wardrobe application using **React Native, Expo,** and **Firebase**, integrating 3 backend services for authentication, data persistence, and image storage
- Built an Outfit of the Day (OOTD) journaling feature with date-based tracking, allowing users to document daily outfits and build a personalized fashion archive
- Utilized **Zustand** for centralized state management and Expo Router for structured navigation, creating a modular and maintainable application architecture.

PROFESSIONAL EXPERIENCE

MX Product Quality and Optimization Coordinator 04/2022 – 08/2022
Samsung Electronics Canada
- Executed structured manual QA test cases for RCS protocol across ~20 Samsung devices and ~15 ISP SIM cards, documenting results and tracking carrier-specific issues using Excel
- Collaborated with team to conduct thorough testing and analysis of product features and functionalities

CERTIFICATES

Mastering System Design — Studied scalable system architecture, distributed systems, databases, caching, and microservices, security culminating in the design of mock enterprise applications with an emphasis on reliability, performance, and architectural decision-making.

SKILLS

- JavaScript
- TypeScript
- HTML/CSS
- Playwright
- React
- Java
- Git
- Postman
- Node JS
- SQL/ NoSQL
- REST
- React Native/ Expo
- Firebase
- AWS
