PROFILE

Highly intuitive recent graduate in Computer Science with a passion for Web/App Development. An optimistic and determined individual with a creative flair and strong intrapersonal skills, I bring a vibrant energy and a proactive approach to every task. Eager to contribute my unique blend of positivity, resilience, and creativity to any role where I can make a meaningful impact and continue to grow both personally and professionally.

PROFESSIONAL EXPERIENCE

MX Product Quality and Optimization Coordinator

04/2022 – 08/2022

Samsung Electronics Canada

- Testing RCS protocol on various Samsung mobile devices with different ISP SIM cards
- Collaborate with the MX Product Quality and Optimization team to conduct thorough testing and analysis of product features and functionalities
- Participate in cross-functional meetings to discuss findings and propose solutions for enhancing product performance

EDUCATION

Honours BSc Computer Science

09/2019 – 04/2025

Lassonde School of Engineering, York University

Toronto, CA

COURSES

Building E-commerce Systems

- Designed and built a fully functional, **RESTful** e-commerce website from end to end
- Utilized modern technology such as **React** (frontend), **Node.js** and **Express** (backend), and **Sequelize** (ORM for database integration)
- Deployed the application to **AWS**, gaining hands-on experience with cloud deployment and infrastructure
- Followed the full software development lifecycle (SDLC), including planning, design, development, testing, deployment, and maintenance

Mobile User Interface

- Developed an Android grocery list application using **Java** and **Android Studio**, with a strong focus on accessibility for users with impairments
- Implemented **voice-to-text** and **text-to-speech** functionality
- Administrated a comparative study to examine performance and resource utilization
- Led User studies by conducting interviews and questionnaires and following the Interaction Design Process approach
